(54) Title: PUSH-CHAIR

## (57) Abstract

A push-chair consists of two delta-shaped side frames (12 and 13) connected by cross bars such as (14), with a seat (11) attached between the side frames, and with wheels (15, 16, 17, etc.) at the bottom ends of the side frame bars (26, 28). A transverse platform (35) is provided at its lower rear, with the rear wheels (16) mounted substantially at the trailing edge of the platform. The seat (11) is forward of the platform, so that a second child can be carried on the platform, in a standing position behind the seat (11). Alternatively, a shopping bag (39) can be carried vertically on the platform.
